SOLAR FINANCE MADE SIMPLE

Knowing full well that money doesn't grow on trees, Ecolease offers a number of finance options that will quickly convert the sun's rays into money saving renewable energy to power your business and its profits. What's more, your energy bill savings can potentially offset your monthly finance repayments, making this one of the smartest investments you will ever make.

Benefits of Solar Finace & Leasing:

- Conserve your cash - No large upfront payment
- Positive cashflow from the onset - energy savings may equal or exceed financial costs
- Repayments or component of repayments may be tax deductible
- Makes budgeting easier with fixed monthly payments

What can Ecolease finance?

- Solar panels, inverters, batteries, EV chargers, and energy efficient lighting

What type of finance does Ecolease offer?

- Ecolease offers all types of equipment finance options, including Chattel Mortgage (Specific Security Deed) and Rent to Own

What if I don't own the building?

- Finance can be provided for the term of the lease agreement

Call our friendly team today to discuss your finance needs - **1300 322 092**

** As the taxation and accounting treatments of various finance products may vary, we recommend you seek independent expert advice before choosing your finance option.*
